

147 147A 147B 147C

14  
REX (CONT'D)

I can do it. But I'm gonna need help.

15  
LOGAN

I love how you say that as if we're actually going to let you do this.

(drama voice)

"I'm gonna need help."

~~PAM PROCTOR~~~~(another version of drama voice)~~~~"I'm going to need help."~~17  
REX

Look, I lied about my credentials.

18  
LOGAN

That's right! And some of us care about the truth, deeply, madly care. Some of us have devoted our lives to the pursuit of it.

Logan is looking deeply at Rex. And she back at him. This is about them, about his broken heart.

19  
REX

(sincere)

I know. And we love to see it.

Pam rolls her eyes at all their subtexting.

20  
REX (CONT'D)

Look, I wasn't lying when I kicked butt on the physical. When I held the team together in the Mars habitat challenge. I can do this. This is industrial engineering. And applied physics. And cleaning up a mess so my friends can come home. I know this could end with a "Rest in Peace, Hero" meme with a picture of me in a flower crown. I'm willing to take that risk. Which makes me your last hope.

Logan shakes his head, unconvinced. But, Pam Proctor holds up her hand. \*

22  
Logan, what's PAM

Newton's fourth of law of physics, Logan?
